

Brose Named a 2020 Supplier of the Year Winner by General Motors

Auburn Hills, Michigan (06. July 2021) Brose was named a GM Supplier of the Year winner in General Motors' 29th annual Supplier of the Year awards.

GM recognized 122 of its best suppliers from 16 countries for performance in the 2020 calendar year. The annual awards highlight global suppliers that distinguish themselves by exceeding GM's requirements, in turn providing GM customers with innovative technologies and among the highest quality in the automotive industry.

This is the 6th time Brose has received the award.

"As GM works to achieve a future with zero crashes, zero emissions and zero congestion, we are proud to have innovative and dedicated suppliers around the world as partners in this mission," said Shilpan Amin, GM vice president, Global Purchasing and Supply Chain.

"Throughout a challenging year, our suppliers have showed resilience and dedication in working toward our shared goal of long-term sustainability for our planet and the communities we serve, while meeting our present needs," Amin said. "We are pleased with what we've accomplished together in the past year and we are excited by the opportunity that lies ahead."

The 2020 Supplier of the Year winners were selected by a global team of GM purchasing, engineering, quality, manufacturing and logistics leaders. Winners were chosen based on performance criteria in Product Purchasing, Global Purchasing and Manufacturing Services, Customer Care and Aftersales, and Logistics.

"The entire Brose organization takes great pride in being acknowledged as a GM Supplier of the Year for the fourth time in a row. This reflects our long-term strategy set forth a few years ago to become a preferred partner to General Motors," said Wilm Uhlenbecker, President, Brose North America. "I am very proud of the Brose team's dedication to customer service during a year filled with unforeseen challenges."

About Brose North America

Brose has been a committed partner to the North American market since 1993. The mechatronics specialist now counts twelve locations across Canada, the United States and Mexico and employs approximately 5,000 people in the region.
