

Future of the Würzburg location

Brose location Würzburg

Würzburg/Bamberg (08. May 2025) On Thursday, May 8, Raymond Mutz, Executive Vice President Drives, presented the current status of the analyses on the closure of the Würzburg location against the background of the planned concentration of the three Franconian Brose locations Coburg, Bamberg/Hallstadt and Würzburg at the Administrative Board meeting of Brose SE.

The Administrative Board agreed to continue the Würzburg location provided that agreements are reached with employee representatives and the public sector that lead to internationally competitive location costs and an economically viable overall concept in Würzburg.

"This is a good basis for conducting constructive negotiations with the works council and IG Metall," explains Raymond Mutz. "I am also talking to the State Chancellery and the Bavarian Ministry of Economic Affairs about the possibility of state subsidies."
