

New access experience: Brose connects doors and interior

Brose side door drive with radar collision protection. The automotive supplier's mechatronic systems make vehicle access safer and more comfortable and convenient than ever before.

Coburg/Germany (24. July 2019) From welcoming the driver with doors that open automatically to convenient entry – the mechatronic systems by automotive supplier Brose offer vehicle owners an entirely new access experience and pave the way to automated driving and car-sharing trends. The family-owned company's unique selling point: only Brose offers perfectly harmonized and connected door and interior products from a single source.

Even from a distance the car recognizes and welcomes the driver with a projection on the ground. With a gesture, the vehicle user signals their desire to enter. The handle-free doors open automatically; a radar sensor prevents collisions. At the same time the windows that were tinted to protect against heat and prying eyes become transparent. The steering wheel disappears into the dashboard and the seat contour adjusts automatically. The second row of seats is also completely electrified for better access to the back and can slide automatically – without making any compromises in terms of safety: an interior sensor recognizes people, pets and children's seats in the vehicle and prevents injuries and/or damages. Buckling up is also more comfortable as the belt is either easily accessible directly at the seat or is presented to the passenger electrically.

Automotive supplier Brose makes this new mobility experience a reality. The company has blended its mechanical, electric, electronic and sensor technology expertise to further develop its vehicle access system. Visitors to the 2019 International Motor Show (IAA) in

Frankfurt can experience the latest features live at the Brose exhibition area under the motto “Enabling Future Mobility”.

Discover more **from 12 to 22 September** at our International Motor Show **stand D01/D02 in Hall 4.0** .

Under the motto "Enabling Future Mobility", Brose will be presenting innovative ideas for extraordinary driving experiences at IAA 2019.
